

Who We Are

N.A.P.E.

The National Association of Power Engineers (N.A.P.E.) is the oldest engineering association in the United States, organized in 1882. Active for 125 years and the longest standing engineering association in the country, N.A.P.E. is dedicated to the purpose of providing advancement through educational opportunities to its members. Through educational courses, books, newsletters, a bi-monthly magazine, chapter meetings and conventions, N.A.P.E. helps bring new information and technology to power engineers across the nation to ensure safe and responsible engineering practices.

Though N.A.P.E. originated as an association solely dedicated to the education of power engineers, as N.A.P.E. continues to grow and the occupations and job titles of our members continue to differ from years past, we are constantly expanding our educational spectrum and exploring new educational opportunities.

What We Do

N.A.P.E.

Power engineers are responsible for the safe and efficient operation and maintenance of equipment that is essential to the generation, transmission, and distribution of power, heat, refrigeration, and so forth in commercial and industrial settings in both the private and public sector. All of these tasks must be performed according to federal, state, and local laws, and codes. Education is the strongest tool in preparing power engineers for the challenging tasks they face while preventing simple human error when the health and safety of many people depend upon the proper operation

of engineering plants. N.A.P.E. provides power engineers with that tool no matter the level of past experience so they may perform to the high standards set forth by the government and their employer.

What We Believe

N.A.P.E.

N.A.P.E. is dedicated to the purpose of education and supports the following: 'This Association shall not be used for the purpose of interfering in any way between its members and their employers, recognizing the identity of interests between employer and employee, and shall not support any project or enterprise that will interfere with the harmony between them. Neither shall it be used for political or religious purposes. Its meetings shall be devoted to the education of engineers in all of its various branches and to the business of the Association. Members pledge to secure and enforce

engineering license laws to prevent the destruction of life and property in the generation and transmission of power.'

Membership

When you become a member of the National Association of Power Engineers, you commit yourself to the dedication and high performance called for by the profession. You immediately become a voice - a positive voice within the Association. Your opinions are joined with others to become positive factors and influences on important matters at high levels within the Association concerning: education, direction and improvement.

When you become a member of N.A.P.E. you join the ranks of famous members: President Herbert Hoover, John Glenn, Henry Ford, Vincent J. Naimoli and Jay Leno.

Membership is only a phone call or click away. Join now!

The National Association of Power Engineers is an Association dedicated to the education of power engineers across the Country. No matter the level of past experience or the proximity to a local Chapter, education is never too far away with N.A.P.E.

We encourage you to visit our website or contact our National Office to receive additional information about becoming a member of N.A.P.E. and joining the oldest engineering association in the United States. See what you have been missing for the last 125 years.
