

# SCHOLARSHIPS & GRANTS

## John L. Carlotto Education Grant Award

Is your N.A.P.E. Chapter looking to make some improvements to their educational programs, but need additional funds to make such improvements? There is money available for N.A.P.E. Chapters who are looking to create or improve upon their educational program!

The John L. Carlotto Education Grant is available up to the amount of \$2,000 to purchase any N.A.P.E. educational materials, including online courses, textbooks, certifications, and DVD's. Education is a great resource and there is always room for improvement.

To apply, have your Chapter send a detailed request including the amount they are applying for and how the funds will improve their educational program for the members of your Chapter.

## Henry D. Cozens Scholarship Award

The Henry D. Cozens Scholarship is in recognition of the contributions of the late Henry D. Cozens to the field of power engineering technology. Particularly, his contribution to the National Association of Power Engineers and its predecessors.

In September of 1879, a number of engineers who worked in power plants, met in the engine room of the Providence, Rhode Island Court House, where Henry D. Cozens was Chief Engineer. Under his guidance, they formally organized themselves into a group and called it, The Engineers Association.

Thus it remained for three years when, on October 25, 1882, the original organization was incorporated as the National Association of Stationary Engineers (N.A.S.E.), with Mr. Cozens as its first National President. N.A.S.E. continued and prospered until 1928, when the corporate name was changed to the National Association of Power Engineers (N.A.P.E.).

The Henry D. Cozens Scholarship has been amended since its conception. Originally offered only to sons of members, the scholarship is now available to sons and daughters of members. In 1975, the program was further amended.

## Felix W. Start Memorial Award

The Felix W. Start Memorial Award was first presented at the 83rd Annual National Association of Power Engineers Convention. New York Chapter 11 was the first recipient.

The Award is given to the Chapter or Association, under the umbrella of the National Association of Power Engineers, judged to have made the greatest contribution to licensing during each year. It is named for Felix W. Start, former National License Law Chairman, for his work in behalf of licensing. He was a Past President of the Worcester, MA Chapter 32 and active at all levels of his Association.

## Charlie Weiss Award

The Charlie Weiss Award, named after Virginia Chapter 1 Past President Weiss, is awarded to the Chapter that brings in the most new members through their efforts of presenting a new educational class or seminar. This award was presented for the first time at the National Convention in Springfield, Massachusetts in 1989.

The Weiss Award is a beautiful plaque with the winning Chapter's name and the date awarded engraved on it. The winning chapter is the holder of this award for one year and is presented to the next winner at the following convention.

A new educational class or seminar is one that has not been offered within the last three years and qualifying students must become members of NAPE during or after attending the new educational class or seminar. Chapters having the most qualifying new members will win the award. All entries must be received before or no later than the first day of the National Convention. The winner will be announced at the Convention in June.

Check the N.A.P.E website at [www.powerengineers.com/Scholarships-and-Grants](http://www.powerengineers.com/Scholarships-and-Grants) for complete information & to download the applications.

Contact the National Office at (413) 592-6273 with any questions.

## DEADLINE: JUNE 1ST 2019
